110 Volt **Mirage™** Lateral Arm Acrylic Patio Awnings
Innovative Elegance . . . Superior Strength . . . Cutting Edge Technology

Patents Pending

**Full 10' extension
for maximum shade!**

Superior design . . .

Designed specifically for Class A use, Carefree's Mirage is the strongest, most durable lateral arm box awning available. Robust, sturdy lateral arms support the elegant acrylic canopy and lead rail.

Quality is in the details . . .

Carefree uses only the most reliable, proven and trusted motors on the market. For worry-free use, the controls are located inside your RV. There's no guessing when operating the Mirage . . . You control extension and retraction.

Best value . . .

Carefree uses only the finest acrylic fabrics to match your RV. Choose from five standard solid acrylic colors or 140 custom acrylic colors. The durable fabric is housed in a heavy-duty, resilient aluminum case that can be ordered in White or Black. Pewter colored case available for an upcharge. The Mirage can also be equipped with the ultimate convenience – wireless remote control.

The original . . .

Carefree introduced the first powered lateral arm awning in 1990. Since then, we've refined our designs and product offering to be able to offer you simply the best lateral arm box awning available.

Best backed . . .

The Mirage is backed by Carefree's Limited Lifetime warranty. Worry free for as long as you own your Mirage!

◀ *Sleek Mirage awning closed for travel*

Two models available:

1 110V Mirage with Direct Response Electronics™

Simply the best Auto Retraction System available . . .

Easy-to-use controls and the Motion Detection System. The Mirage is the only box awning that has a system to detect canopy motion, the most important element prevent wind/weather damage.

The Mirage automatically retracts when the canopy reaches a certain level of movement – you determine the sensitivity level on the control panel. Patent #7242162

Sensor box is located inside the lead rail for a finished look

2 Mirage with Manual Crank All the durability, strength, and color options as the 110V models, but extended and retracted manually with a hand crank.
